Swimming Beach Testing:												
The standards developed for the Great Lakes in Wisconsin and may be used for inland beaches are:												
If the <i>E. coli</i> count is greater than 1000 MPN/100 mL, the beach is closed.												
If the <i>E. coli</i> count is greater than 235 MPN/100 mL but less than 1000 MPN/100 mL, an advisory is issued.												
If the <i>E. coli</i> count is under 235 MPN/100 mL, the beach has no advisories or warnings issued.
