

Section 15: Service Piping for Meter Settings

- A. Where the original service piping is installed for a new metered customer; where existing service piping is changed for the customer's convenience; or where a new meter is installed for an existing unmetered customer, the owner of the premises at his/her expense shall provide a suitable location and the proper connections for the meter. The type and size of meter setting shall comply with specifications established by the District. Where it is possible to set meters in the basement, or other suitable place within the building a suitably sized meter horn shall be installed to accommodate the installation of the meter. Meter horns may be obtained from the District.

- B. No permit will be given to change from metered to flat rate service.
